

The Los Angeles Child Guidance Clinic is here for them.

Los Angeles Child Guidance Clinic

® Serving Central and South Los Angeles for over 80 years.

Did you know?

Last year 5,364 children and their families from our community benefited from Clinic services.

While providing a full range of services to children with serious emotional problems, the Los Angeles Child Guidance Clinic is also recognized for its experience and expertise in providing early intervention services to children five years old and younger. Reaching out to children and families early on greatly contributes to children's future successes, including their school readiness.

Join us on January 27th for our Early Intervention Mental Health Services Conference, featuring a keynote address by **Dr. David Satcher, former U.S. Surgeon General**, as well as a presentation and book-signing by **Bebe Moore Campbell**. For more information on this event, contact Amanda at (323) 766-2360 Ext. 3360 or visit our web site.
